	EXTRA IMPRINT			\$10 per extra colour (first colour is free)	

Screen Print is only suitable for simple logos printed onto our stock fabric colours, but is more economical in the long term as the cost to reproduce is low once the screens have been created.

Dye Sublimation and Digital print allows for unlimited colours and full photographic print quality.

Acrylic has a set of stock fabric colours to choose from. PVC can be custom colours.

Screen Charge

Think of a screen as a 'stencil' used to print the logo onto the fabric.

One screen is required for each part of the logo which has its own colour.

This is a one-off cost, once the 'stencil'/screen is created it can be reused over and over again.

Extra Imprint Charge

This is effectively the cost of the ink. The first colour in the canopy logo and the first colour in the valance logo is free.

Each colour on top of this attracts the imprint charge and this cost is applied to each order placed.

* Save on Screen Charge by re-using the same screens created for your Cafe Umbrella
