ShadeStar 32

Reinforced Aluminium Frame

The ShadeStar 32 frame is famous because it is so fast and easy to operate. We have sold thousands of ShadeStar 32 frames because they are beautifully engineered and constructed, combining light weight with exceptional strength. The smooth operating ShadeStar 32 frame suites majority of applications and provides genuine reliability for the largest number of users.

ShadeStar 40

Reinforced Aluminium Frame

The ShadeStar 40 frame is the new benchmark in strength for portable marquees. The ShadeStar 40 frame is the commercial quality frame that is highly valued by customers operating in the harshest of conditions like beaches and party hire. The ShadeStar 40 frame is cleverly designed to retain a fast and easy operation. If you can handle a little extra weight you will be rewarded with unprecedented toughness and longevity.

ABOUT OUR MARQUEES

ShadeStar 32

Easy setup/packdown - General use

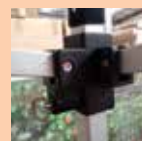

ShadeStar 32 Roof Truss

Truss size 28x12mm
The reinforced truss is stronger than the typical hollow truss configuration because the reinforcing bars support the truss in the length and also reduces flex when twisted

ShadeStar 32 Upper and Lower Leg

Upper leg 32x32mm
Lower leg 28x28mm
The lacquer finished aluminium legs slide easily in and out of one another. The relative size of each leg allows enough room to slide easily and keep the frame ridged.

Pinch Proof Locking Mechanism

The self locating spring pins allow for easy pinch free operation of the marquee. Just pull the pin to unlock the mechanism.

Telescopic Legs

The marquee has 5 height adjustments, just pull the stainless steel locking pin and adjust leg to the desired height. Ideal for uneven surfaces.

Marquee Foot

Heavy Duty aluminium foot plate with holes suit pegs

vs

ShadeStar 40

Sandy areas - available in 3m & 6m

ShadeStar 40 Roof Truss

Truss size 33x15mm
The reinforced truss has thicker walls and additional reinforcing ridges along the length of the truss. This makes the ShadeStar truss the strongest on the market.

ShadeStar 40 Upper and Lower Leg

Upper leg 40x40mm
Lower leg 35x35mm
The anodized aluminium gives a robust finish to the frame and the reinforcing ridges give additional strength.

Pinch Proof Ring Pull Leg Adjustment

Just pull the outer leg up and the pin will automatically lock in place. To go higher or to collapse the leg just pull the pin. 5 height settings.

Pinch free Push Button Frame Lock

The pin automatically locks when the frame is set up. Just push nylon button protector to collapse

Marquee Foot

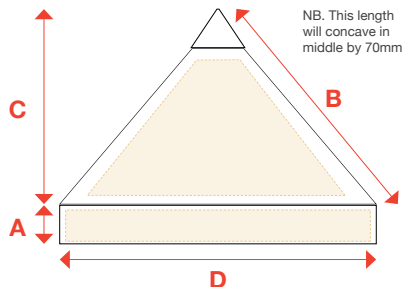

Heavy Duty nylon foot plate with steel reinforcing plate, holes suit pegs

Fabric

ShadeStar Marquee Canopies are made from the best possible materials and are designed in a way to make them very easy to set up and take down.

Fabric Specifications:

600d Polyester with a waterproof polyurethane backing

All of the colours have a UPF 50+ Protection rating

UV Stabilised-colours stay brighter longer

Special Features

that EXTEND the LIFE of your canopy

Double Stitched seams

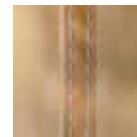

Double lined corners to reduce wear and tear, shower/rain proof

Peak pole protector, with elastic or cord locators, to keep the peak poles in the correct position and to reduce wear through

Easy clip strap to secure canopy against the wind

Hot taped seams to maximise water proofing

Easy hook & loop attachment pads for easy fitting and removal of the canopy to the frame

Wall Options

Adding walls to your marquee will not only protect you from wind and early morning and afternoon sun. If you choose to have it printed, it will give your marquee the wow look of a professional, well thought, outdoor media. Gives your branding an opportunity to re-enforce messages and impress customers with high quality images and/or creative text.
