

FABRIC TUBE BANNER

The Fabric Tube Banner is similar to the traditional Pullup Banner except it's just a touch more superior in looks.

It's a simple tension fabric display stand that consists of a steel base with lightweight aluminum tube poles that fit together to form the curved top shape.

The stretch fabric pillowcase graphic slips over the frame snugly making it an attractive single or double-sided display.

The stretch fabric allows graphics to look rich and vibrant creating a luxurious display.

Add some class to your next gala event, conference or exhibit booth with the Fabric Tube Banner, it will give you maximum impact on your audience.
