MARQUEES

Star Outdoor marquees and umbrellas have been officially rated as 99% most effective against UV by ARPANSA, making them one of the safest solutions for providing shade outdoors.

Star Outdoor's marquees are engineered for durability and ease of use. Including reinforced aluminium frames, woven polyester canopies with a waterproof polyurethane backing, hot-taped seams to enhance water resistance and double-lined corners to minimise wear and tear.

We provide engineer-grade weight recommendation reports for our Deluxe and EventStar umbrellas, ensuring safe and stable installation. An engineer's report is provided to all customers.

We understand the importance of reliability in governmental endeavours, which is why our materials are meticulously sourced, our craftsmanship is unrivalled and our systems are watertight.

ISO 9001 QUALITY MANAGEMENT SYSTEMS

ISO 9001 is our commitment to delivering consistent quality through a structured management system that meets your needs and industry standards. Our certification reflects rigorous auditing and process documentation, ensuring we maintain the highest standards for you.
