

In Pavement Socket (IPS)

Stainless Steel faceplate
with push lid

Hole for pin or padlock

Hole to insert umbrella
pole

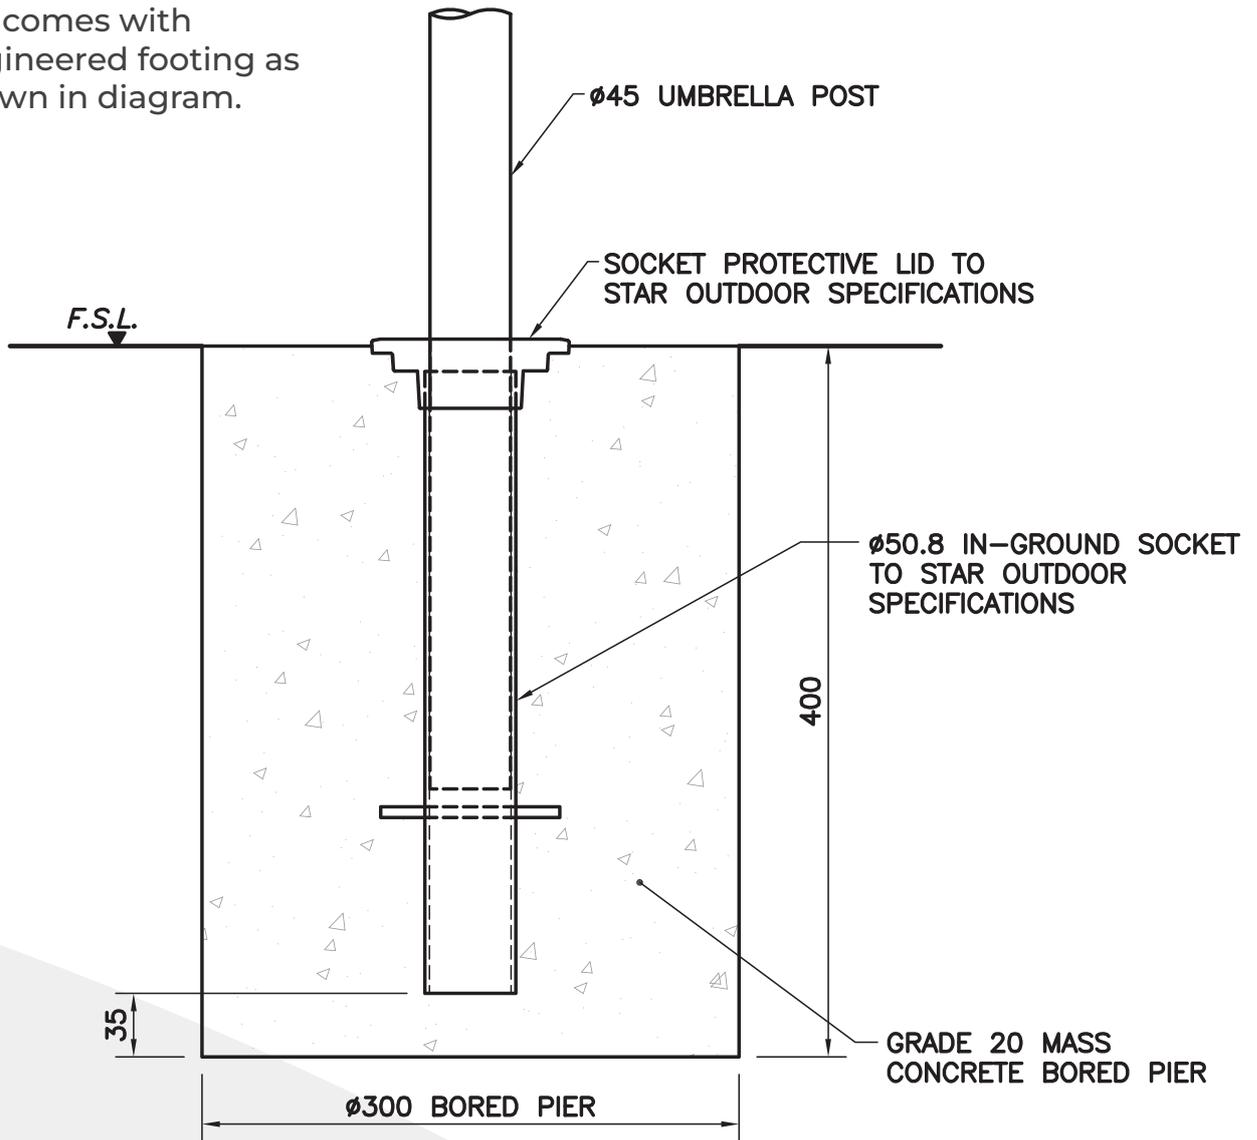

The IPS for cafe umbrellas secures the poles into cement becoming permanent umbrellas. It features a stainless steel faceplate with push lid. The lid has a hole where a pin or padlock can be used to secure the umbrella pole. When installed into the pavement in the closed mode, the IPS does not pose a trip hazard.

To install the umbrella simply push where indicated and insert the umbrella pole. Once in place, secure the umbrella with a pin or padlock.

IPS Technical Drawing

IPS comes with engineered footing as shown in diagram.
